## HA 70 Pair - digital hearing amplifiers

Rechargeable hearing amplifiers

Extra-small design

2 programmes for loud and quiet environments

Storage box with integrated powerbank

Ergonomic fit behind the ear

Practical 2-piece set for amplification on both sides

Ideal if hearing ability is limited

Amplifies the volume of all sounds indoors and outdoors

Low-noise rendering

4 attachments each for individual adjustment to the ear canal

Frequency range: 200 - 7100 Hz

Amplification: max. 49 dB

Volume: max. 123 dB

Product dimensions: 3.7 x 2.7 x 3.1 cm

Incl. 2 integrated NiMH batteries

Medical device

3 year guarantee

Sales unit: 6 / Shipping carton: 4 x 6

EAN no.: 4211125 64101 6

Item no.: 641.01

## Tailored solutions thanks to various hearing amplifier designs

Each design has its benefits. Choose a hearing amplifier that is right for you and live life to the full once more.

### BTE hearing amplifiers

**Feature:** classic model that is comfortable to wear

These hearing amplifiers are worn behind the ear (BTE) and all functional components, such as the speaker, are integrated within the housing. The sound is transmitted to the ear via air conduction in the plastic tube.

**Advantage:** Thanks to the design, older people will also find them easy to use.

### RIC hearing amplifiers

**Feature:** improved technology without transmission loss

RIC devices are a subtype of BTE hearing amplifiers. The speaker is located directly inside the ear, which makes the sound very clear.

**Advantage:** Good acoustic transmission characteristics thanks to direct transmission of sound within the ear canal.

### ITE hearing amplifiers

**Feature:** small, discreet and virtually invisible

These hearing amplifiers are worn in the ear (ITE). They are therefore the smallest and most unobtrusive hearing amplifiers. All of the components are placed directly within the ear canal.

**Advantage:** Good acoustic transmission characteristics. Easy to fit. Ideal for people who wear glasses.
